2025 CYMBALS

Welcome to IMPACT Percussion!

On behalf of our administrative, design, and instructional teams, we would like to sincerely thank you for your interest in participating in IMPACT Percussion's 2025 season. Our entire team is looking forward to another remarkable year full of meaningful moments, personal growth and development, and inspiring experiences.

At IMPACT Percussion, our mission is to **empower youth to reach their full potential through achieving excellence in the performing arts**. We carry out our mission by creating an educational environment that fosters performance, positivity, and growth at the highest level.

Please use the following information to best set yourself up for success during auditions and going forward into the coming season. You will be evaluated based on both your fundamental understanding of playing cymbals as well as your ability to apply new information. Cymbals are an instrument that rewards hard work, but you can achieve a high level of execution very quickly by maxing out your effort level and making corrections quickly.

- *IMPACT Percussion 2025 Cymbal Education Team*

Rhythmic Accuracy

We strive for mathematically perfect rhythms unless specifically defined otherwise. This means a strong sense of internal timing and pulse control is imperative. During the season, a great deal of work must be done at home every week to perfect your sound before arriving at rehearsal. Everyone is responsible for playing in time and keeping the energy of the music alive!

Blend and Balance (ear training)

Musical blend begins with a mature awareness of one's personal sound in relation to others. Moving around the floor creates a variety of demanding listening environments, requiring constant adjustments in a player's sound production and contribution. It is imperative to know your role in the balance of the entire ensemble at all times.

Other Key Points

- This packet is designed to be used as a tool and a reference, but is not the only source of our information.
- There are lots of right answers when it comes to cymbal technique, this just happens to be the right answer for IMPACT this year.
- Since everyone's body is different, some minor adjustments may be necessary to ensure everyone feels comfortable while playing.
- Attention to detail in the minutia is what separates the good cymbal lines from the great cymbal lines.
- Always strive to be the best version of yourself.

- Max out every rep. With the physicality of cymbals, it is imperative to clean full performance energy.

Goals

- Always strive for a BIG, STRONG uniform quality of sound, we are musicians first and foremost - sound quality is everything!
- BE RELAXED. Cymbals are a very physically demanding instrument, and we are going to feel tense and uncomfortable at times. It is important that you breathe deeply and allow as much oxygen as possible to flow through your muscles.
- Create a strong presence behind the instrument with a big upper body, while maintaining a relaxed posture.
- When practicing, ALWAYS use a metronome, mark time, and use a mirror if possible. The mirror will help show us how we look while playing our instrument.
- Always carry yourself in a mature and confident way when we are together.

What We Are Looking For

- Be the best person you can be - your true self can only be discovered when no one is watching.
- Never get frustrated when something doesn't click right away. There is a learning curve to cymbals, so don't get upset when things seem difficult right now. Everything will come together as we practice and get comfortable with our instrument.
- Change and new ideas should be embraced with open minds and a willingness to adapt.
- Have a sense of humor and remember to have fun with your friends. Although we are here to get better, we want to enjoy ourselves and our time with everyone as well!

Holding the Cymbals

- The strap will sit in between the webbing of your thumb and pointer finger.
- The strap should be felt behind the wrist.
- Fingers should feel relaxed and slightly touching the cymbals.
- Straps should be tight on the hands but not cutting off circulation to the fingers. You should be able to maintain control over the plates even when fingers are released.

Positions

Set

- Hands should be down to your side.
- Knot of strap at inner seam of pants.
- Slight bend in the elbows (2"- 3").
- Blades to the audience.
- Plates are parallel to each other and perpendicular to the ground.

Choke

- Cymbals tucked underneath the arm.
- Squeeze into your chest feeling 4 contact points - the torso, upper arm, lower arm, and your hands.
- Elbows pinned down against the torso.
- Tips of cymbals are about 2"- 3" apart.

Flat

- Center of your body/middle of torso.
- Knots about sternum level.
- Cymbals roughly 45°/shoulder to hip/seatbelt.
- Elbows out, but relaxed.
- Hands spread for control.
- Straight line from wrist to elbows through the ring finger, parallel to the ground.

Port (Eval)

- Knots at eye level.
- Parallel to each other.
- Perpendicular to the ground.
- Cymbals will be 2" apart.
- Same distance from the body as flat.
- Hands spread for more control.
- Elbows have a straight line through the ring finger.

Technique

Prepping for a Crash - Left Arm

- At flat, fingers are relaxed and off the cymbals.
- Slightly flatten out the wrist until the cymbal is parallel to your forearm.
- Make sure to maintain the 45° angle. The angles between the cymbals should always match.

Prepping for a Crash - Right Arm

- At flat, fingers are relaxed and off the cymbals.
- Pull the arm back as if you are drawing a bow or someone is pulling a string attached to the back of your elbow.
- Forearms stay parallel to the ground with the end of the cymbal sitting on the outside of your bicep.
- Cymbal should be pointing towards the contact point (2" in from the outside of the left cymbal).

Playing the Crash

1. Drive

- Maintain orch. prep angles (blades).
- Straight line path forward with the right hand.
- Aim for front 12 o'clock, 3 fingers space from the edge.

2. First Contact

- What to feel: flexing from fulcrum created by the strap in webbing of thumb/palm.
- On hand: relaxed palms, still supporting the weight of the cymbal.
- Requires relaxation to achieve second contact/reaction, AVOID tensing up.

3. Pull

- Pull as soon as the first contact hits.
- Lightens the impact of the second contact.
 - Without the pull, the weight of the cymbals cause the cymbals to land heavily on each other.
 - "Out", or in the opposite direction as the drive in.

4. Second Contact

- Cymbals do the work.
- First and second contact sounds should be as similar as possible.
- No more, no less; same bright sound.
- Hand speed/velocity - Fast in, Faster out!

Taps

- Tips of cymbals at eye level.
- Cymbals at about 90°.
- Cymbals about 2" space between tips.
- Hands at shoulder width.
- Just like flat/port/choke you should feel lines between elbows through the ring finger.

Playing the Tap

- The dynamic will determine how high we raise the right cymbal, but it should not pass vertical.
- There will be more wrist movement than elbow, but the elbow will dip a little to cover the 2" distance to make contact with the cymbal.
- Gravity will do most of the work, just let the cymbal drop. With higher dynamics we will add a little power behind it.
- After contact, go with the flow and reset at tap.

Zings

- Cymbal bells at eye level.
- Right cymbal is making contact right above the left cymbal bell.
- There will be about a 30° angle.
- Quick hard grind/push from the right cymbal against left cymbal ridges.
- Feel the pull from the rising of the right elbow.
- Left arm slightly pulls down.
- Cymbals reset in tap position.

FELT

Flat Eval Lead Tap

Hits

Flat Down Eval Down Lead Down Tap Down

Musical notation for the Hits section, consisting of eight measures. Each measure contains a single eighth note followed by a quarter rest. The notes are on the second line of the staff (G4). The notes are labeled above the staff as Flat, Down, Eval, Down, Lead, Down, Tap, and Down.

Flips

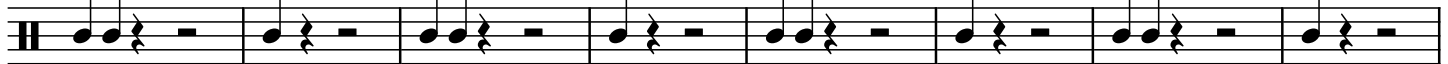

9 Flat Down Eval Down Lead Down Tap Down

Musical notation for the Flips section, consisting of eight measures. Each measure contains a single eighth note followed by a quarter rest. The notes are on the second line of the staff (G4). The notes are labeled above the staff as Flat, Down, Eval, Down, Lead, Down, Tap, and Down.

L R Flips

17 Flat Down Eval Down Lead Down Tap Down

Musical notation for the L R Flips section, consisting of eight measures. Each measure contains a pair of eighth notes followed by a quarter rest. The notes are on the second line of the staff (G4). The notes are labeled above the staff as Flat, Down, Eval, Down, Lead, Down, Tap, and Down.

R L Flips

25 Flat Down Eval Down Lead Down Tap Down

Musical notation for the R L Flips section, consisting of eight measures. Each measure contains a pair of eighth notes followed by a quarter rest. The notes are on the second line of the staff (G4). The notes are labeled above the staff as Flat, Down, Eval, Down, Lead, Down, Tap, and Down.

Crash Choke Breakdown

A musical staff in 4/4 time. The first measure contains a whole rest. The second measure contains a whole rest. The third measure contains a quarter note on the middle line (G4) followed by a whole rest.

Start mark time

4 Out 1 Prep 4 Crash Choke Out 1 Prep 4

A musical staff in 4/4 time. Measure 4: whole rest. Measure 5: quarter note on the middle line (G4). Measure 6: whole rest. Measure 7: whole rest. Measure 8: whole rest.

7 Crash Choke Out Prep 4

A musical staff in 4/4 time. Measure 7: quarter note on the middle line (G4). Measure 8: quarter rest with a choke symbol. Measure 9: whole rest. Measure 10: whole rest.

9 Crash Choke Out Prep 4

A musical staff in 4/4 time. Measure 9: quarter note on the middle line (G4). Measure 10: quarter rest with a choke symbol. Measure 11: whole rest. Measure 12: whole rest.

11 Choke Out Prep 4

A musical staff in 4/4 time. Measure 11: quarter note on the middle line (G4). Measure 12: quarter rest with a choke symbol. Measure 13: whole rest. Measure 14: whole rest.

13 Choke Out Prep 4

A musical staff in 4/4 time. Measure 13: quarter note on the middle line (G4). Measure 14: quarter rest with a choke symbol. Measure 15: whole rest. Measure 16: whole rest.

15 Choke Out Prep 4

A musical staff in 4/4 time. Measure 15: quarter note on the middle line (G4). Measure 16: quarter rest with a choke symbol. Measure 17: whole rest. Measure 18: whole rest.

17 Choke Down

A musical staff in 4/4 time. Measure 17: quarter note on the middle line (G4). Measure 18: quarter rest with a choke symbol. Measure 19: whole rest. Measure 20: whole rest.

The Process

Grind Release Prep Grind Release Prep

Musical notation for measures 1-4. Each measure contains a single note with a diamond-shaped head, followed by a cymbal symbol (a vertical line with a horizontal bar) and a horizontal line. The notes are positioned on the first line of the staff. The techniques are labeled above each measure: Grind, Release, Prep, Grind, Release, Prep.

5 1 contact exaggated pull through Return flat 1 contact exaggated pull through Return flat

Musical notation for measures 5-8. Each measure contains a single note with a diamond-shaped head, followed by a cymbal symbol and a horizontal line. The notes are positioned on the first line of the staff. The techniques are labeled above each measure: 1 contact exaggated pull through, Return flat, 1 contact exaggated pull through, Return flat.

9 2 contact exaggated pull through Return flat 2 contact exaggated pull through Return flat

Musical notation for measures 9-12. Each measure contains a single note with a diamond-shaped head, followed by a cymbal symbol and a horizontal line. The notes are positioned on the first line of the staff. The techniques are labeled above each measure: 2 contact exaggated pull through, Return flat, 2 contact exaggated pull through, Return flat.

13 Dead Crash Dead Crash

Musical notation for measures 13-16. Each measure contains a single note with a diamond-shaped head, followed by a cymbal symbol and a horizontal line. The notes are positioned on the first line of the staff. The techniques are labeled above each measure: Dead Crash, Dead Crash.

17 Full Crash Return 3 Full Crash Return 3

Musical notation for measures 17-20. Each measure contains a single note with a diamond-shaped head, followed by a cymbal symbol and a horizontal line. The notes are positioned on the first line of the staff. The techniques are labeled above each measure: Full Crash Return 3, Full Crash Return 3.
